

Intro to Social Science Data Analysis

Seminar 3: Gathering Data

Christopher Gandrud

September 10, 2012

First Assignment

Due: Monday 24 September

Create a new data frame with country-level data from at least **two** different sources.

Create a folder in your Dropbox Public folder and **email me the link**.

The folder needs to include:

1. The new data frame saved as a .csv file.
2. A text file **describing the variables and their sources**.
3. A notebook .html file detailing how you created the data frame and saved it as a .csv.

Sampling

Create a plan for sampling Yonsei University, Wonju students.

World Bank Data

1. Download data from the World Development Indicators on **Access to electricity (% of population)**.
2. Rename the variable **AccessElectric**.
3. Create a new country ID variable,
